Level 2 & Level 3 Competency Profile Guidance

This document provides guidance on the competency and personal profile expectations for different LCS Levels (2 & 3). Note it is indicative guidance and an individual does not need to meet all criteria, since strengths in one area may compensate for a shortfall in another and there is a multiplicity of development and career routes that can be taken that in order for an individual to develop appropriate experience and competency.

L2 & L3 Leadership Competencies Framework

The following five competencies\(^1\) provide an overarching framework for LCS L2 and L3 competency; they are based on systems thinking ideas and concepts.

1. The ability to think in terms of processes, value streams and systems; knowing how to lead systems.
2. The ability to problem solve, understand variability and waste
3. Understanding how we learn, develop and improve; leading learning & improvement
4. Understanding the behaviour of people
5. Giving vision, focus and direction to the organisation

Competency has two dimensions – knowledge and practice. To possess a competency entails having the requisite knowledge relating to it and the ability to practice and apply the knowledge in the workplace or an organisational setting.

Competency is gained and developed from a combination of formal/informal education and experiential learning (ie "learning through reflection on doing"). In general, the higher the LCS level, the greater the mastery of each competency.

Career Profile: Roles, Responsibilities
